## PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 3+ years of experience building scalable, high-performance web applications using React, Next.js, and Node.js. Proven expertise in system design, cloud deployment, and leading engineering teams to deliver production-grade solutions.

## WORK EXPERIENCE

### Frontend Development Team Lead

Sentara Health

December 2024—Present, Virginia, United States

- Guided a cross-functional engineering team in designing scalable healthcare web applications using Agile, improving development velocity by 15% and code quality by 20%.
- Architected and executed scalable frontend and backend solutions using modern technologies, enhancing system performance, maintainability, and user experience.
- Optimized and automated CI/CD pipelines, reducing release cycles by 40% and improving deployment stability and monitoring.
- Directed the migration of legacy healthcare systems to a modern cloud-ready architecture, significantly improving uptime, performance, and scalability.
- Ensured HIPAA-compliant development practices, implementing secure authentication, data protection measures, and patient-centric features to improve engagement and system security.

### Frontend Development Team Lead

Ebizeo Information Services

January 2024—December 2024, Remote

- Directed the Frontend architecture and development of a scalable admin panel and corporate website using React.js and Material UI, improving maintainability and development efficiency.
- Designed and implemented high-performance, responsive user interfaces, improving overall user experience metrics by 30% through optimised rendering and reusable component architecture.
- Mentored and guided junior frontend developers through code reviews and best practices; improving code quality and adherence to clean architecture principles.
- Collaborated with backend, product, and design teams in Agile sprints to deliver production-ready features on schedule while ensuring scalability and performance optimization.

### Software Developer 1

Wishfy Technologies Private Limited

July 2022—November 2023, Noida, Uttar Pradesh

- As a former Developer I enhanced scalable and responsive UI components by converting design mock-ups and wireframes into production-ready interfaces with a strong focus on performance and cross-browser compatibility.
- Built and integrated reusable frontend components and state management solutions, improving code maintainability and accelerating feature development cycles.
- Collaborated with product managers, designers, and backend engineers within iterative Agile cycles high-quality features, improving application functionality and contributing to increased platform engagement.

### Web Development Intern

The Cloud Box

January 2022—June 2022, Remote

- Built and streamlined a React.js web application and admin panel, implementing REST APIs and CRUD features to improve performance and usability.

## PROJECT

### Flipkart Fully Cloned

Full Stack – MERN

Masai

- Implemented secure REST APIs and Redux state management for product, cart, and order workflows that improved overall application responsiveness and decreased average load times by at least 20%.
- Integrated Paytm payment gateway to enable secure and reliable online transactions.

## EDUCATION

### Bachelor of Computer Application

IPS Academy – Indore • Madhya Pradesh • 2020

## SKILLS

Leadership: Speaking, Fundraising, Product Development, Communication, Partnerships, Scalable System Design and Data Structures.

Front End & Back End: CSS Advance, React, Next, Typescript, Express, Node, Kubernetes, Docker, HTML5, MongoDB, Firebase, Javascript, Python.
